PROFILE

I am a web developer with a decent knowledge of JavaScript as a front-end and back-end language, responsive frameworks, database, and best code practices. My objective is simply to be the best web developer that I can be and to contribute to the technology industry with all that I know and can do. I am dedicated to perfecting my craft by learning from more seasoned developers, remaining humble, and continuously making strides to learn all that I can about development. While a student at the University of Karachi, I studied Mathematics, and I believe that my understanding of problem-solving and complex algorithms are also skills that have and will continue to contribute to my overall success as a developer.

PROJECTS

- **CUISINE RESTAURANT WEB APP**

A completely functional, gorgeous, and contemporary website that serves customers' demands by allowing them to search for recipes using the items of their choice.

Made with: HTML5, CSS3, JavaScript

- **OPEN BOOK LIBRARY**

Developed a user-friendly fully responsive library web app, leveraging my skills in web application development, to enhance accessibility and streamline the borrowing and returning process for library patrons.

- **TODO APP**

Created a robust and intuitive to-do app using vanilla JavaScript, delivering a seamless user experience and incorporating key features such as task management, priority sorting, and deadline tracking to boost productivity and organization.

SKILLS

- **Front End Languages:** CSS, HTML, Javascript
- **Frameworks:** React, Bootstrap
- **Back End Languages:** Javascript
- **Databases:** MongoDB
- **Tools:** VSCode, SublimeText
- **Server Side:** Node, Express
